Document Title: Pratt & Whitney - Source Qualification List

WARNING

This document is the property of Pratt & Whitney (P&W), a division of Raytheon Technologies Corporation, and contains confidential and / or proprietary information. You may not possess, use, copy or disclose this document or any information in it, for any purpose, including without limitation to design, manufacture, or repair parts, or obtain FAA or other government approval to do so, without P&W's express written permission. Neither receipt nor possession of this document alone, from any source, constitutes such permission. Possession, use, copying or disclosure by anyone without P&W's express written permission is not authorized and may result in criminal and/or civil liability.

APPLIES TO: Pratt & Whitney Group

1. PURPOSE AND SCOPE:

Following is a tabulation of P&W Group qualified sources for materials and processes which require source qualification (AMS, PWA and CPW specifications).

The inclusion of a source in this tabulation signifies only that the source, using materials, facilities and procedures acceptable to P&W Group, has produced a product which meets all specification requirements. The source is not relieved of responsibility for continued conformance as determined by periodic testing, and evaluation of facilities and procedures.

This tabulation shall not be construed as a guarantee by P&W-MCL that materials or processing will meet specification requirements, nor does it relieve the supplier from his contractual obligation to deliver conforming materials and parts.

As additions, deletions and changes are made as an ongoing process and the listing is published quarterly, this information is presented as a guide. If up-to-date information is required, cognizant MCL personnel should be contacted directly.

Note: *As of 9/30/14, PWC Suppliers have been added to the SQL as part of the One Company Initiative. These suppliers have been added to the SQL based on PWC Source Qualification system at the time.*

For the following processes:	Notes or exceptions:
AMS 2418	Source qualification not required when plating is used for masking
AMS 2480	Source Qualification is for Material Source Only
AMS 2481	Source Qualification is for Material Source Only
AMS 2485	Source Qualification is for Material Source Only

For the following processes:	Notes or exceptions:
AMS 2666	Refer to AMS 2664
AMS 2668	Refer to AMS 2665
AMS 2669	Refer to AMS 2664 or AMS 2667
AMS 2671	Refer to AMS 2670
AMS 3087	Refer to CPW 326
AMS 3117	Source Qualification is for Material Source Only
AMS 3132	Source Qualification is for Material Source Only
CPW 296	Refer to AMS 2664
CPW 20	See Specification for applicable processing specification
PWA 830	See Specification for applicable processing specification

2. OWNERSHIP AND APPROVAL:

The Chief, Materials Control Laboratories (MCL) PW South & Supervisor Supplier Metallurgical Development PW North, are the owners of this procedure. All revisions to this procedure must be approved by the owners and balloted in accordance with MCL Manual Section C-5.

3. NATURE OF CHANGE FOR THIS ISSUE:

- Updated SQ List

Pratt & Whitney Proprietary - Subject to the restriction on the title or cover page
